Learn about the Get Started app, navigating your device, and support.

 Windows 10

Email 1 | 2

This email has been designed to work with Windows 10 devices.

Welcome to Windows 10

Getting Started Series

This is the first in a series of emails designed to help you get the most out of Windows 10. This email includes the info you need to get up and running quickly.

If you've opted out of receiving email, you'll only get one more in this series. See the bottom of this email if you'd like to opt back in.

It's the Windows you know, only better

Windows 10 is so familiar and easy to use, you'll feel like an expert. Because updates are automatically enabled¹, you'll have the very latest features when they're released, which means Windows will just keep getting better.

Get to know the Get Started app

We've designed the Get Started app to help you get the most out of Windows 10. It can help you get on the web, navigate your device, move files, set up printers and hardware, and more. Any time we add new features to Windows 10, the app will automatically update¹ to help you with those, too.

Meet Cortana, John

You now have your very own personal assistant. Cortana² works across your day and your Windows 10 devices to help you get things done. By learning more about you over time, Cortana becomes more useful every day.

Just talk or type and Cortana will help you:

Getting around your device

Search with the taskbar or Cortana²

The easiest way to search the web, your device, and access and share the files on OneDrive is through the Windows search box on your taskbar or by simply asking Cortana.

We're here to help

Have a question or need some info? Help is already built in. Just use the Windows search box and Windows 10 will use Cortana² to get a quick answer, a step-by-step tutorial, or a connection to a real person through our Contact Support app.⁴

Discover everything your Microsoft account can do

With this one account, you can take your settings, preferences, and files you have backed up on OneDrive with you across all your devices – and not just Windows devices⁵. Plus, you'll only need to remember one user ID and password.
