

Ways to use email on an Apple computer (iMac, etc.)

You can use (1) a special purpose communications program (Mail), or
(2) a general purpose communications program (Safari)

some_one@some_where.some_domain

**Webmail is the same experience on Mac & PC, etc.
using any Web Browser**

Gmail: google.com/gmail/about/
Hotmail: outlook.live.com/owa/

AOL: webmail.aol.com or my.screenname.aol.com

Webmail stores / saves all your messages (Inbox, etc.) on the service providers equipment (servers).

Apple Mail allows you to save messages to local-only mailboxes (folders) also.

When you have many email accounts (addresses), a special purpose program like Mail can manage all the Inboxes.
